**SUPPLEMENTARY INFORMATION:** This proposed rule change is designed to adjust PTO fees in accordance with the applicable provisions of title 35, United States Code; and section 10101 of the Omnibus Budget Reconciliation Act of 1990 (as amended by section 8001 of Public Law 103-66), all as amended by the Patent and Trademark Office Authorization Act of 1991 (Public Law 102-204).

**BACKGROUND:**

Statutory Provisions

Patent fees are authorized by 35 U.S.C. 41 and 35 U.S.C. 376. A fifty percent reduction in the fees paid under 35 U.S.C. 41(a) and (b) by independent inventors, small business concerns, and nonprofit organizations who meet prescribed definitions is required by 35 U.S.C. 41(h).

Subsection 41(f) of title 35, United States Code, provides that fees established under 35 U.S.C. 41(a) and (b) may be adjusted on October 1, 1992, and every year thereafter, to reflect fluctuations in the Consumer Price Index for all urban consumers (CPI-U) over the previous 12 months.

Section 10101 of the Omnibus Budget Reconciliation Act of 1990 (amended by section 8001 of Public Law 103-66) provides that there shall be a surcharge on all fees established under 35 U.S.C. 41(a) and (b) to collect $115 million in fiscal year 1997.

Subsection 41(d) of title 35, United States Code, authorizes the Commissioner to establish fees for all other processing, services, or materials related to patents to recover the average cost of providing these services or materials, except for the fees for recording a document affecting title, for each photocopy, and for each black and white copy of a patent.

Section 376 of title 35, United States Code, authorizes the Commissioner to set fees for patent applications filed under the Patent Cooperation Treaty (PCT).

Subsection 41(g) of title 35, United States Code, provides that new fee amounts established by the Commissioner under section 41 may take effect thirty days after notice in the *Federal Register* and the *Official Gazette of the Patent and Trademark Office*.

Recovery Level Determinations

This proposed rule adjusts patent fees for a planned recovery of $716,723,000 in fiscal year 1997, as proposed in the Administration's budget request to the Congress.

The patent statutory fees established by 35 U.S.C. 41(a) and (b) are proposed to be adjusted on October 1, 1996, to reflect any fluctuations occurring during the previous 12 months in the Consumer Price Index for all

urban consumers (CPI-U). In calculating these fluctuations, OMB has determined that the PTO should use CPI-U data as determined by the Secretary of Labor. However, the Department of Labor does not make public the CPI-U until approximately 21 days after the end of the month being calculated. Therefore, the latest CPI-U information available is for the month of February 1996. In accordance with previous rulemaking methodology, the PTO uses the Administration's projected CPI-U for the 12-month period ending September 30, 1996, which is 3.1 percent. Based on this projection, patent statutory fees are proposed to be adjusted by 3.1 percent. Before the final fee schedule is published, the fees may be adjusted slightly based on updated data available from the Department of Labor.

Certain non-statutory patent processing fees established under 35 U.S.C. 41(d) and PCT processing fees established under 35 U.S.C. 376 are proposed to be adjusted to recover their estimated average costs in fiscal year 1996. Three patent service fees that are set by statute will not be adjusted. The three fees that are not being adjusted are assignment recording fees, printed patent copy fees and photocopy charge fees.

The proposed fee amounts were rounded by applying standard arithmetic rules so that the amounts rounded would be convenient to the user. Fees of $100 or more were rounded to the nearest $10. Fees between $2 and $99 were rounded to an even number so that any comparable small entity fee would be a whole number.

Workload Projections

Determination of workload varies by fee. Principal workload projection techniques are as follows:

Patent application workloads are projected from statistical regression models using recent application filing trends. Patent issues are projected from an in-house patent production model and reflect examiner production achievements and goals. Patent maintenance fee workloads utilize patents issued 3.5, 7.5 and 11.5 years prior to payment and assume payment rates of 79 percent, 55 percent and 32 percent, respectively. Service fee workloads follow linear trends from prior years' activities.

General Procedures

Any fee amount that is paid on or after the effective date of the fee increase would be subject to the new fees then in effect. For purposes of determining the amount of the fee to be paid, the date of mailing indicated on a proper Certificate of Mailing or Transmission, where authorized under 37 CFR 1.8, will be considered to be the date of receipt in the PTO. A Certificate of Mailing or Transmission under Section 1.8 is not "proper" for items which are specifically excluded from the provisions of Section 1.8. Section 1.8 should be consulted for those items for which a Certificate of Mailing or Transmission is not "proper." Such items include, inter alia, the filing of national and international applications for patents and the filing of trademark applications. However, the provisions of 37 CFR 1.10 relating to filing papers and fees with an "Express Mail" certificate do apply to any paper or fee (including patent and trademark applications) to be filed in the PTO. If an

application or fee is filed by "Express Mail" with a proper certificate dated on or after the effective date of the rules, as amended, the amount of the fee to be paid would be the fee established by the amended rules.

In order to ensure clarity in the implementation of the new fees, a discussion of specific sections is set forth below.

**Discussion of Specific Rules**

*37 CFR 1.16 National application filing fees.*

Section 1.16, paragraphs (a), (b), (d), and (f)-(i), if revised as proposed, would adjust fees established therein to reflect fluctuations in the CPI. Further, section 1.16, if revised as proposed, would remove the undesignated text following paragraph (d), and add a new paragraph (k) including the provisions of such deleted undesignated text. In addition, § 1.16(k) would also be applicable to any additional fees required by §§ 1.16(i) and (j).

*37 CFR 1.17 Patent application processing fees.*

Section 1.17, paragraphs (b)-(g), (m), (r) and (s), if revised as proposed, would adjust fees established therein to reflect fluctuations in the CPI.

Section 1.17, paragraphs (j) and (n)-(p), if revised as proposed, would adjust fees established therein to recover costs.

*37 CFR 1.18 Patent issue fees.*

Section 1.18, paragraphs (a)-(c), if revised as proposed, would adjust fees established therein to reflect fluctuations in the CPI.

*37 CFR 1.20 Post-issuance fees.*

Section 1.20, paragraphs (c), (i), and (j), if revised as proposed, would adjust fees established therein to recover costs.

Section 1.20, paragraphs (e)-(g), if revised as proposed, would adjust fees established therein to reflect fluctuations in the CPI.

*37 CFR 1.21 Miscellaneous fees and charges.*

Section 1.21, paragraph (a)(1), if revised as proposed, would establish a non-refundable application fee which reflects the costs of processing an application for the registration examination. Currently, the PTO evaluates and processes the applications of individuals who do not qualify for admission or those who withdraw from the examination, but generally refunds the examination fee to such applicants. Thus, other fee payers bear the costs of this evaluation and processing. The proposed amendment would shift the expense of evaluating applications to all applicants. In order to offset the proposed application fee, the examination fee is proposed to be slightly decreased.

Section 1.21, paragraphs (a)(3) and (a)(6), if revised as proposed, would adjust fees established therein to recover costs.

*37 CFR 1.445 International application filing, processing, and search fees.*

Section 1.445, paragraph (a), if revised as proposed, would adjust the fees authorized by 35 U.S.C. 376 to recover costs and reflect current business practices.

*37 CFR 1.482 International preliminary examination fees.*

Section 1.482, paragraphs (a)(1)(i), (a)(1)(ii), and (a)(2)(ii), if revised as proposed, would adjust the fees authorized by 35 U.S.C. 376 to recover costs.

*37 CFR 1.492 National stage fees.*

Section 1.492, paragraphs (a), (b) and (d), if revised as proposed, would adjust fees established therein to reflect fluctuations in the CPI.

**Other Considerations**

This proposed rule change is in conformity with the requirements of Executive Order 12612, and the Paperwork Reduction Act of 1995, 44 U.S.C. 3501, et seq. This rulemaking contains no information collection within the meaning of the Paperwork Reduction Act. This proposed rule has been determined not to be significant for purposes of Executive Order 12866. The PTO has determined that this proposed rule change has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The Assistant General Counsel for Legislation and Regulation of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that the proposed rule change would not have a significant impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354).

The proposed rule change increases fees to reflect the change in the CPI as authorized by 35 U.S.C. 41(f). Further, the principal impact of the major patent fees has already been taken into account in 35 U.S.C. 41(h), which provides small entities with a 50-percent reduction in the major patent fees.

A comparison of existing and new fee amounts is included as an Appendix to this notice of proposed rulemaking.

## Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

**Patents will Expire as Follows:**

(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).

(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).

(3) All design patents are granted for a term of 14 years from the date of the grant.

However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

# MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

## SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
